

## 2025 P4P: Documentation of cancer variables measure requirements

Your hospital's report with your rate\* and your raw data report are in your Dropbox folder (See cancer documentation reports).

9	5	Complete documentation of designated cancer variables (CRC, Breast, Whipple, Thyroid)	
		90 - 100%	5
		< 90%	0

### Variables

**CRC** (includes all CRC CPT and ICD-10 codes that enable CRC tab; see Appendix A and the Adenocarcinoma variable)

1. If Positive Surgical Margin = Yes, **Which margin was positive?** is NOT "Not specified"
2. **TME Grade** is NOT "Not graded" (ICD-10 C20 only, exclusions are local excision 45171, 45172, and rectal cancer in upper 1/3 location cases)

**Whipple** (includes all Whipple CPT codes and cancer ICD-10 codes; see Appendix A and the Whipple Neoadjuvant Treatment variable)

1. **How Pancreatic Duct Size was determined** is NOT "Pancreatic duct size not measured"
2. **Pancreas Texture** is NOT "Not Reported"

**Thyroid** (includes thyroid CPT codes and ICD-10 C73)

1. **T stage** is NOT "Not Available"
2. **Size of malignancy/tumor/mass** is NOT "Not Available"
3. **Postoperative surgical pathology results** is NOT "Complete histology unavailable"

**Breast** (includes mastectomy CPT codes and cancer/DCIS ICD-10 codes listed in Program Manual)

1. **Date of diagnosis known** = Yes
2. **T stage** is NOT "Staging not performed"

### How to calculate numerator/denominator:

Add all numerators then add all denominators and divide the total numerator into total denominator

### Example

For all of the measures there were 60 eligible cases (denominator)

Out of the 60 cases, 50 of the requirements were met (numerator)

50/60 = 83% (does not earn points for this measure)
